

Perth Data Management Luncheon

Join us at the 2018 Spring Data Management Luncheon with

Stephen Malajczuk, Katalyst Data Management

presenting:

“Metadata Migration to the PPDM Model – A ‘Good Practice’ General Methodology, Lessons Learnt and Case Study Examples”

Abstract: Metadata is becoming increasingly important for companies seeking to make better and more timely data-driven decisions. As the volumes of data that companies obtain are increasing, there is a greater need to ensure that metadata is in a condition that is easily accessible, portable and accurate. The PPDM Data Model is designed for this purpose, but migrating the metadata from disparate data sources can be fraught with hazards. Based on the collective experience of hundreds of metadata migrations, we share a general “good practice” methodology to help ensure a successful project. We also describe some potential pitfalls to be aware of, and some effective quality control techniques. Some general case study examples are also shown for illustration. Lastly we describe the benefits of utilising the PPDM Data Model, and why a metadata migration is worth the effort in the long run.

Biography: A first class honours degree qualified geophysicist with a post-graduate certificate in Project Management. Stephen has 15 years of international experience in the seismic exploration industry. In his time in the industry he has worked as a field geophysicist, a team leader on seismic processing projects, and also managed the day-to-day operations of a small processing centre in Perth. More recently, Stephen has applied his extensive knowledge and experience to the subsurface data management sphere at Katalyst Data Management.

Event Details:

Date: Thursday November 15, 2018

Where: Woodside Energy Auditorium

Time: 12:00 - 1:30 PM

Cost: Free for members and non-members

Please visit www.ppdm.org/events to register to attend this **FREE** event now!

Thank you to our Sponsors & Venue Provider

The Professional Petroleum Data Management (PPDM) Association

*The place where data management professionals go for participation
in a global community of data managers, access to a body of knowledge,
and for professional development opportunities.*
