

# Perth Data Management Field Trip

## Field Trip Details:

Date: August 14 – 9:00am-12:00pm

Where: Pawsey Supercomputing Centre, Kensington

Cost: Additional \$45 USD (Workshop participants only)

## *Data Management In Support of the Digital Transformation*

The morning of August 14 will feature an optional field trip to the Pawsey Supercomputing Centre in Kensington. The field trip attendees will enjoy a VIP tour of the Supercomputing Centre, along with two presentations. The field trip has an additional cost and includes bus transportation to the Supercomputing Centre and back. Space is limited, book early to reserve your spot – register online during the [workshop](#) registration.

Attendees on this VIP Tour will learn about High Performance Computing in Australia and the big science being enabled by the Centre for our researchers. The Pawsey Centre (Integral to the Australian phase of SKA) includes the Centre's Galaxy Supercomputer, which fulfills the real-time processing requirements of the Australian Square Kilometer Array Pathfinder (ASKAP) telescope. This tour will include a science showcase, which highlights the amazing research being enabled by Pawsey supercomputers and expertise, and a walk through the whitespaces where they are housed. (From the Pawsey Supercomputer Centre website)

Included in the field trip are two presentations:

***Geoscience Data Storage and Management for Advanced Data Analytics***

Chitra Viswanathan (CSIRO)

***Large Volume Data Storage on Cloud Platforms***

Neil Constantine (DataCo) & Jess Kozman (Woodside)
