Desired Outcomes

• Clearly defined, consistent terms and definitions for
  – Well “status”, “classification”, “type”, “function”…

• A single standard set of plot symbology
  – Logical construction
  – Available to everyone
Current Challenges

• Terminology
  – Dozens of different lists
  – Same term, different meaning
  – Different term, same meaning

• Symbol sets
  – Huge diversity
  – Symbols may not be associated with a definition
Scope

- PPDM workgroup created 15 kinds of “status” information
  - Atomic (faceted), defined, consistent
  - Open for public review and comment

- Standard symbol set review
  - Associate with defined terms
  - Construction based on atomic elements (facets)
High Level Plan

- Synergy with PUG, ESRI others
- Create on-line environment for collaboration
- Review terms and definitions
- Review symbology
- Public release
Potential Deliverables

• Well status facets
  – Name and definition
  – Value lists, with definitions

• Plot symbols
  – Font set
  – Image files
  – Embedded in ESRI product
Special Considerations

• This is highly proprietary, many gatekeepers!
• Expect 80/20 solution
• Adoption by many industry segments
  – Regulators
  – Operators
  – Software vendors
  – Data vendors ...
